

## THE 24' SAVANNAH

The Savannah is one of those uniquely Norsic innovations. The unit is identical to the Sierra in every respect except that the interior layout is a mirror image of the Sierra, allowing entry from the opposite side of the trailer. This feature makes delivery and placement possible in locations that could not otherwise be considered. In all other respects the Savannah offers everything the 24 foot Sierra does; Clean, uncluttered lines with a handsomely designed interior that maximizes utility in an atmosphere of high style. Visually pleasing, completely climate controlled and sturdily built, Savannah delivers a lot of comfort at a great price. Custom-fitted skirting conceals the undercarriage.

# The 24 Foot Savannah

Climate controlled, tastefully decorated (in different color schemes in the ladies' and men's sides) and wired for sound, the 24 foot Savannah is a shining example of efficiency in an extremely handsome package. This unit and its mirror image sister unit offer a lot of comfort for the money and the choice of configurations makes placement an easy process.

(The technical specs for this unit are exactly the same as the Sierra - 2 pages back.)
